Theoretical Hull Speed @ 0° heel: 6.4 knts

(Target Boat Speed)

Note your boat speed.

Note the apparent wind angle from your masthead fly.

Find your current apparent wind angle on the chart. Compare the target speed to your boat speed:

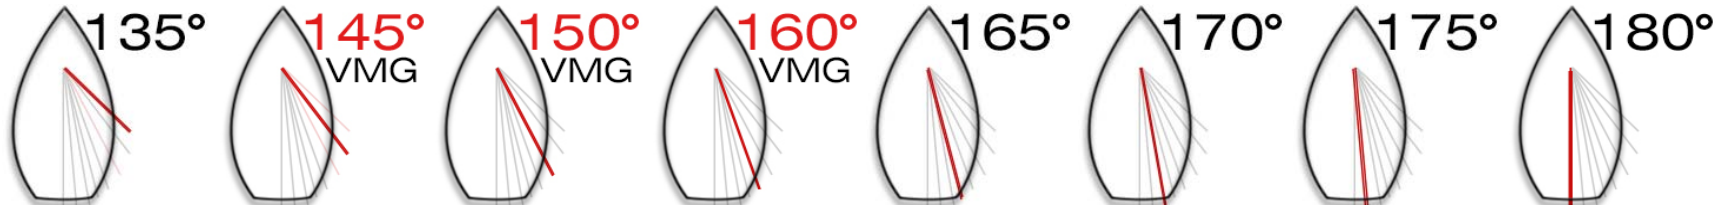

- If your boat speed is higher than the target speed, sail a lower course (shorter and slower).
- If your boat speed is lower than the target speed, sail a hotter course (longer and faster).
